## AVIATION SERVICES COMPANY AUTOMATES DAILY HCM BUSINESS PROCESSES

*Software robot helping manage international Human Capital Management*

**Chicago, Illinois:** AAR Corporation, an independent provider of aviation services to commercial and government customers in over 100 countries, began implementation of a software robot today to automatically integrate corporate, domestic and international employee information. This automated process will eliminate a number of manual processes and free up the corporate Human Resources department to focus their efforts on more valuable tasks, like finding qualified talent to accommodate AAR's demand and international growth. This process automation is another step in AAR's digital journey, leveraging their partner eAlliance Corporation to help them apply technology to improve business processes.

"We anticipate a number of benefits from this sophisticated technology, including improved data integrity, a more timely and manageable human capital system, and freeing up our HCM leadership to meet future human capital demand."

*-Candace Cavalier, V.P. Human Resources, AAR Corporation*

"What we look forward to the most on this project is delivering measurable ROI in three to six months while enabling AAR's line of business to focus on the human side of HCM." *-Ramesh Kumar, Founder & CEO, eAlliance Corporation*

Third paragraph – Detail & Context
